REASONS FOR ALLOWANCE

Examiner acknowledges a submission of the amendment and arguments filed on October 28, 2003. Claims 2 and 9 are deleted; Claims 1, 7 and 8 are amended. Amendment and arguments have overcome rejections under 102 (b) and 103(a).

The following is an examiner's statement of reasons for allowance:

An amended independent Claim 1 discloses a voltage converter, which inter alia includes a fault prevention circuit having a shunting transistor diverting a base drive current from the switching transistor upon the occurrence of a controller fault. The closest reference for the claim is Nelson, which discloses most of other limitations of the claim. However, it fails to show the recited limitation. Another reference is Williams, which shows some protection of the controller output by a zener diode. However, it does not show the recited shunting transistor activated upon a controller fault. The same limitation is recited in other independent Claims 8 and 12, thus making the case allowable. Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
